

LIFESKILLS

SENSORY INTEGRATION SPECIALISTS

“helping each child put the pieces together...”

Since 1993...

Celebrating the 29th
Anniversary

Dear Parents,

LifeSkills, a center working on “*a better and a deeper understanding of your child*” to guide/support you as parents, and by “*helping each child put the pieces together*” for **30 years** is the first and the model center in Central Florida.

We believe that every child is in a very different world than the others. That is why every child is so special. They are learning day by day, step by step, and piece by piece... Every small piece that they see, taste, touch, smell, hear, or feel is an experience for them...

They are improving their skills by using these small pieces and creating their worlds... In this world, they have their own approaches, patterns, styles, understandings, feelings, thoughts...

If there is a child who is missing any of these small pieces or is not able to organize these pieces well enough, they might have a hard time and also you might have a hard time as a parent...

IT IS NOT THAT THEY WANT TO HAVE A HARD TIME OR THEY WANT YOU TO HAVE A HARD TIME,

IT IS THAT THEY ARE NOT ABLE TO DO IT IN A DIFFERENT WAY...

We believe that *Sensory Integration & Processing* is the first and most important step for children to have enough pieces and connections to use in their life...

Therapists, Parents & Children are the three parts of the team that have to be on the same page to be successful. Love, knowledge, experience, and patience are our strengths...

As the Director of LifeSkills, I am always here to lead my team, update and refresh ourselves, work together with parents, and have kids that are independently able to have peace, calm, fun, love, and success...

I am proud of my team, including the therapists, office staff, parents, and our kids for sure...

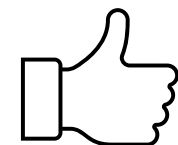

Please do not hesitate to come to LifeSkills or reach out to me by email for any reason...

THE FIRST AND THE LEADING
SENSORY INTEGRATION CLINIC
IN CENTRAL FLORIDA

What Our Parents Say

"I owe my son's high self-confidence and self-esteem to LifeSkills' tremendous therapy program. Before LifeSkills, he thought he was a loser and had no friends. After therapy, he 'found himself and is quite accepted socially by his peers."

"My eleven years old has become aware of his surroundings, able to calm himself when he needs to, has connected emotionally, etc. I could go on and on about the relief and joy our family is experiencing after suffering misdiagnosis and confusion for seven years! We are very grateful!!!"

"The thorough testing that was done by the LifeSkills therapist was extremely informative- and encouraging! So many of my son's problems could be helped. Now, one and a half years later, we see a stronger boy (physically and mentally), more coordinated, and more in control of his body and behavior! "

"My daughter was beginning to display a negative attitude about school and learning ... As proof of the remarkable achievement of LifeSkills, myself, and course my daughter's hard work, she made the Principal's List (which means more A's than B's in all subjects and also outstanding citizenship behavior)"

"My two-year-old can eat many foods now...what a new and wonderful experience for her!"

INTENSIVE THERAPY PROGRAMS

"Be AWARE of your child, UNDERSTAND your child, HELP your child..."

Maximum Results Make This Therapy Approach Perfect for Helping Children Both in School and At Home.

This intensive treatment program is ideal for children struggling with motor, sensory, attention, language, and related problems needing an extra academic boost to succeed at school. It's perfect for parents who want maximum results in the shortest amount of time. (10 hours per week)

Kids come for two hours per day and build up a momentum of learning that can produce dramatic results. As a result, children who are struggling in school are given a greater opportunity to be better prepared for the academic day.

Some results can include:

- Improved behavior
- Improved social skills
- Greater ability to stay focused and pay attention
- Greater sense of calm, less anxiety
- Improved ability to work independently
- Fewer meltdowns
- Increased ability to retain academic information

This focused schedule allows your child and therapist to accelerate learning and integration in a way not possible with standard treatment. As a result, the therapy has a greater impact on the child with a higher rate of success sooner than traditional treatment.

Who Qualifies for an Intensive?

Any child exhibiting problems with attention, language skills, hyperactivity, hypersensitivity, ADHD, behavior problems, overload, or another difficulty that may be associated with sensory/motor integration is a candidate.

FREE SEMINARS

-Virtual-

**FIRST WEDNESDAY OF EVERY MONTH
12.00pm**

"A BETTER UNDERSTANDING OF YOUR CHILD FROM A SENSORY PERSPECTIVE"

If you are asking "WHY" about your child's daily/social/physical/emotional behaviors...

If you are asking "WHAT" is happening in your child's brain...

If you are looking for "HOW" you can help your child to make their life easy...

We are inviting you for a better understanding of your child...

You will observe/analyze/understand your child from a Sensory perspective...

Give yourself and your friends this opportunity to help your children...

RSVP is REQUIRED
